The photograph shows a rectangular metal plate. On the left side, there are two circular holes, each containing a small black object. To the right of these holes is a series of radial lines emanating from a central point. Further to the right, there is a larger rectangular area with a series of radial lines emanating from a central point, similar to the one on the left.

# Speciaal

## Made to measure

### Classic, Modulair en Flex

Naast het uitgebreide standaard programma biedt Franke Beverage Equipment ook de mogelijkheid klantspecifieke buffetbladen te produceren. Jarenlange ervaring op dit gebied maken het mogelijk een passend blad te produceren in elke gewenste vorm voor elke bar. Franke heeft op dit gebied een aantal klinkende referenties, zoals de meer dan 400 strekkende meter barbladen in het Ziggo Dome te Amsterdam, prachtige bladen in het Frits Philips Muziek Gebouw en in het Park theater te Eindhoven.

Elke combinatie van hoeken, rondingen, tapgoten en spoelbakken is mogelijk. Uiteraard kan dit gemaakt worden in elke gewenste lengte. Een compleet assortiment van geperste goten (Modulair) kan in de bladen toegepast worden wat Franke uniek maakt. Deze toepassing combineert de voordelen van standaard roosters met de hygiëne van ronde hoeken in de geperste goten. Is het design van uw blad niet uitvoerbaar met het brede assortiment van geperste goten? Geen nood. Franke Beverage Equipment maakt uw blad volledig naar specificatie door middel van de classic methode. Alle mogelijke rondingen, goot- en glazenlek maten zijn beschikbaar. Aangezien Franke blijft innoveren op dit vlak is onlangs een nieuwe productie methode toegevoegd. Bij de Flex methode wordt gebruik gemaakt van zowel modulaire als classic technieken gecombineerd met een andere waterkering en een mooie matte satijn finish.<sup>1)</sup>

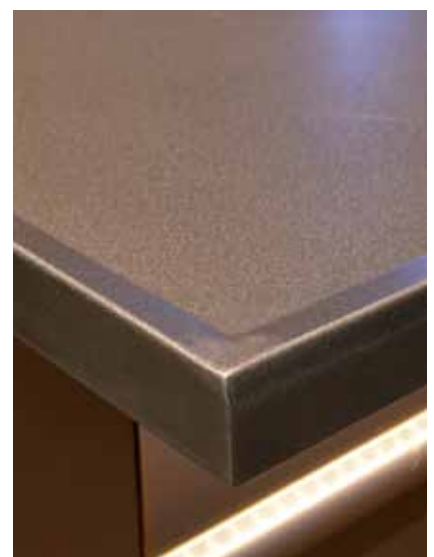

Uiteraard staat Franke u bij met advies om tot de beste keuze te komen voor uw bar.

Besides our extensive standard worktop portfolio Franke Beverage Equipment also offers custom made worktops. Years of experience in this area makes it possible to produce a worktop in any shape or form for any bar. Franke has some very good references like for example the Ziggo Dome in Amsterdam with over 400 meters of custom made worktops. The Frits Philips Music Building and Park Theater in Eindhoven have great custom made worktops too.

Every combination of any shape and any function is possible. Franke has three basic methods of producing these worktops. The first one, modular, uses the advantages of pressed drain areas and standard grids. The classic method offers total freedom in terms of dimensions, shapes and curves. The third recently added method combines the previous methods including a new water recess and a nice and modern satin finish.<sup>1)</sup>

Of course Franke will support you in making the right choice for your bar.

Satijn finish <sup>1)</sup> Satin finish <sup>1)</sup>
